

Galaxy Mighty Trac ND L-4: All year 'specialist' for skid steer loaders

New tread further extends Galaxy's tire range for skid steer loaders / all year 'specialist' for all types of surfaces / 10 % larger footprint / Superior in terms of wear, cut and chip resistance, tensile strength, performance on snow and heat resistance.

19.05.2020 | Amsterdam

Based on the globally recognised expertise of Galaxy in producing high quality skid steer tires, the new Galaxy Mighty Trac ND was made to deliver year in year out. This newly developed L-4 tire for skid steer loaders equally excels on hard surfaces like roads or paved farm yards as well as sticky mud, loose sand, or snow. As reliable all year 'specialist', the unique tread pattern with large blocks provides traction whatever the circumstances.

Designed to perform – and last

The non-directional tread pattern of the Mighty Trac ND is characterised by large tread blocks, stepped shoulder lugs, and angular sipes. Whilst the large lugs lead to a footprint that is 10 per cent larger than the footprint of comparable competition tires, the grip-enhancing angular sipes play a vital role in ensuring reliable traction on slippery surfaces. The new Galaxy skid steer tire also surpasses competition tires in terms of high on-road wear resistance, effective cut and chip resistance, tensile strength and modulus, as well as its particularly outstanding heat resistance.

The extraordinary robustness and durability of this tire is owed to special tread compounds. In addition to the strong sidewall construction with rim protectors, they effectively safeguard the Mighty Trac ND against any external damage. "This new tire for skid steer loaders was developed for owners and operators who need top performers year in year out, and on all kinds of surfaces, without having to change tires from summer to winter and back. Thanks to its special construction and compounds used, that is exactly what the Mighty Trac ND stands for", says Angelo Noronha, President EMEA at Alliance Tire Group.

The new skid steer tire Galaxy Mighty Trac ND is available in sizes 10-16.5NHS and 12-16.5NHS. Size 14-17.5NHS is currently under development.

About ATG

Alliance Tire Group is a part of Yokohama Group. With nearly 60 years of experience, the Alliance Tire Group specializes in the design, development, manufacturing, and marketing of Agriculture, Forestry, Construction, Industrial and Earthmoving tires under the Alliance, Galaxy and Primex brands.

ATG serves customers in 120 countries, across 6 continents and offers a full spectrum of products, from basic entry-level tires to a broad range of superior quality value-added products. All of the Group's tires are designed, developed and tested at its advanced R&D centres around the world.
